Lock by Tiffany began with a padlock brooch cast in gold. Designed by Tiffany in 1883 for a loving couple, the everyday object was imbued with the deepest of meanings. Today, love looks different than when the brooch was first gifted, but its reason remains. Designed to keep safe that which is cherished, Lock by Tiffany is a universal symbol of what matters most.

A feat of craftsmanship over one year in the making, the inventive clasp on the Lock bracelet is designed to gracefully swivel securely into place like a padlock itself. With highly polished 18k gold and hand-set pavé diamonds, this icon of love was expertly designed to hug the wrist, gliding on effortlessly unlike traditional circular bracelets. The Lock by Tiffany rings, earrings and pendants offer unique expressions of the padlock motif.
